

## ArKaos A10 Media Server HD

ArKaos A05 Media Server is the 'light' version of the A10, which allows impressive performances at a reduced price.

The A10 consists of a very powerful computer that comes pre-installed and configured with the DMX version of the ArKaos video software, as well as a vast library of high quality digital media from the world's best visual content providers. The A10 is designed for tough conditions, with double hard drives in RAID for a faster data processing performance. It also comes with 2 latest generation nVidia graphic cards for a guaranteed optimal performance and a superior video resolution.

The A10 is ready to be plugged in and go, it is pre-configured to work directly with all market leading DMX consoles while allowing manual set-ups for all other programmable DMX consoles.
